- include individual actions

Specific Programme PEOPLE = Marie Curie Actions

Overall strategic objective:
Make Europe more attractive for researchers.

„[The specific programme PEOPLE] aims to strengthen, quantitatively and qualitatively, the human potential in research and technology in Europe, by stimulating people to take up the profession of a researcher, encouraging European researchers to stay in Europe, and attracting to Europe the best researchers from the entire world.“

(PEOPLE work programme 2010, p. 4)

Early-stage researchers:

- are in the first four years (FTE) of their research careers (starting at the date of obtaining a degree which would formally entitle them to embark on a doctorate)

Experienced researchers:

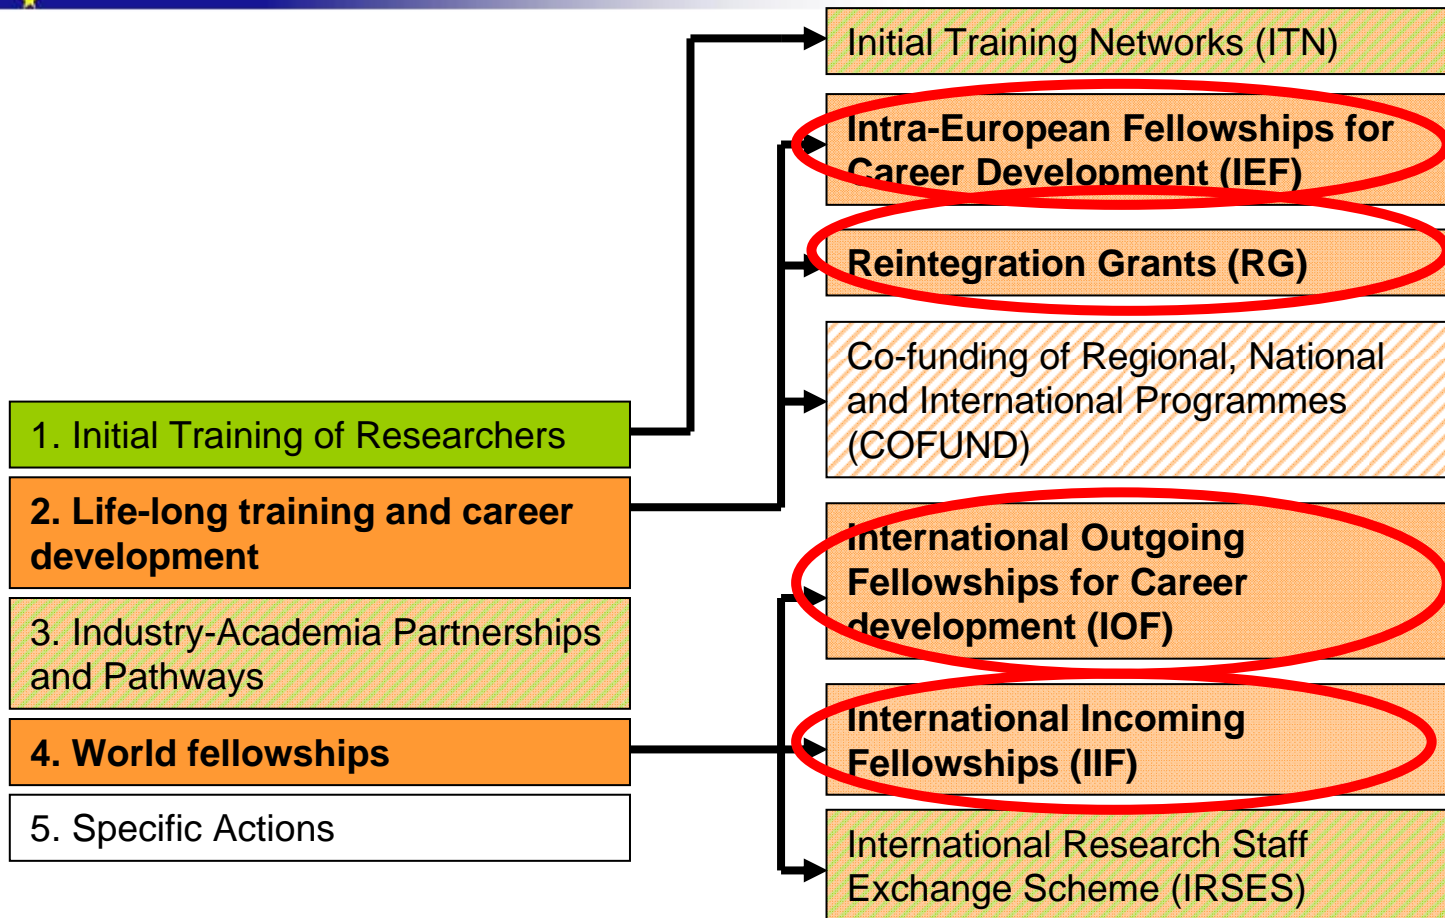

- are in possession of a doctoral degree, independently of the time taken to acquire it

OR

- have at least four years (FTE) research experience

„At the time of the relevant deadline for submission of proposals, [...] researchers **must not have resided or carried out their main activity** (work, studies, etc) **in the country of their host organisation for more than 12 months in the 3 years immediately prior to the reference date**. Short stays, such as holidays, are not taken into account such as EMBL... as international **European interest organisations** or international organisations are concerned, this rule does not apply to the hosting of eligible researchers, however the appointed researcher must not have spent more than 12 months in the 3 years immediately prior to the reference deadline for submission of proposals [...], in the same appointing organisation.“

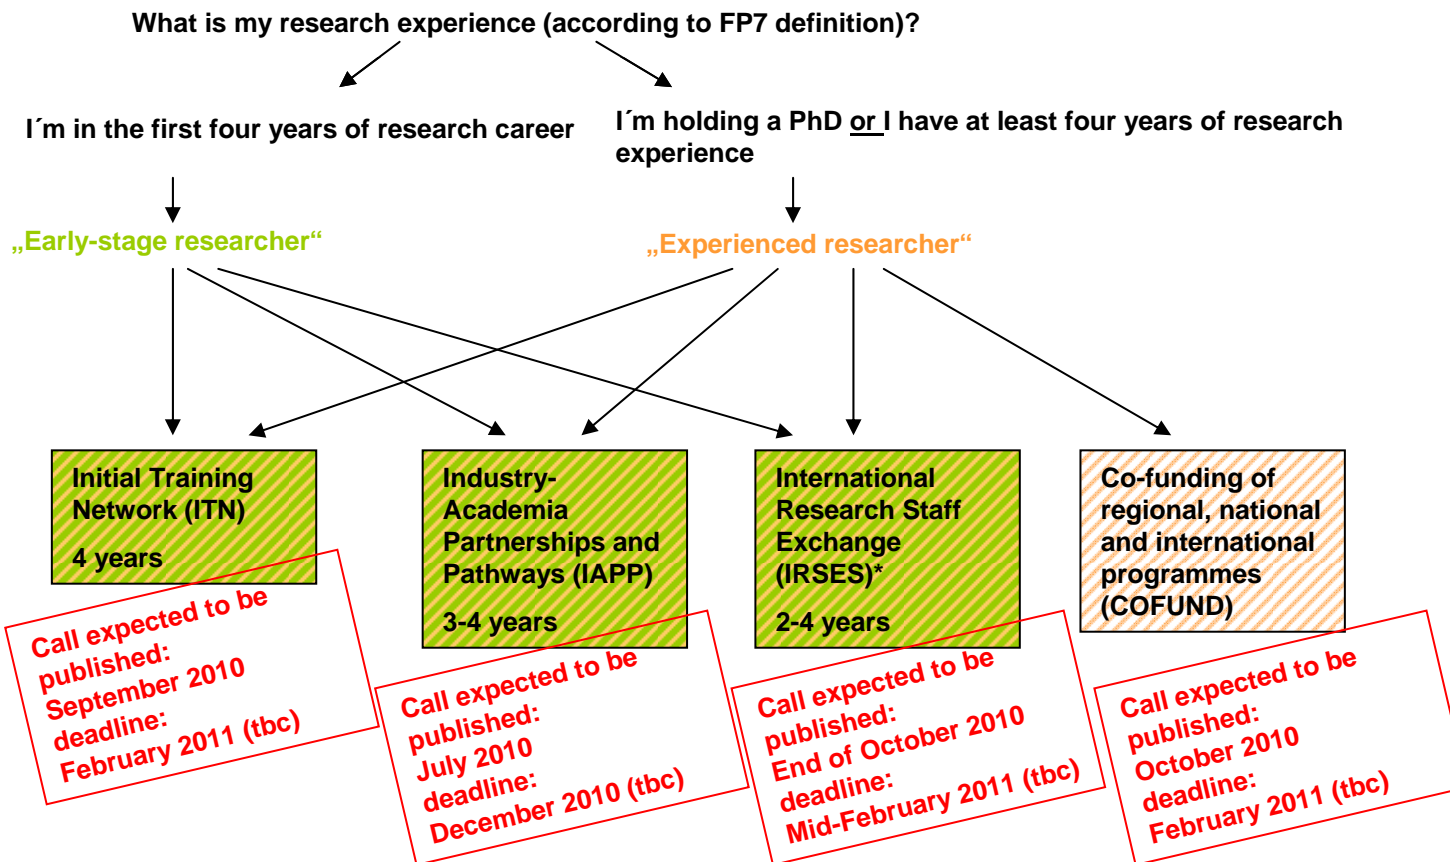

= proposal submitted by one or several organisations („host-driven actions“)

= proposal submitted by an individual researcher in conjunction with the host organisation („researcher-driven actions“)

„Host-driven actions“

The Specific Programme IDEAS is implemented by the **European Research Council (ERC)**: the first pan-European funding agency for Frontier Research

Frontier Research: a new understanding of basic research. Frontier research avoids distinctions between „basic“ and „applied“ research, between „science“ and „technology“ and between traditional disciplinary boundaries. Projects are „high-risk high-gain“

“Retain – Repatriate – Recruit”

- increase competition, recognition and international visibility for excellent individual scientists and scholars in Europe

ERC Advanced Investigator Grant: attract and reward established independent research leaders

- improve career opportunities and independence, especially for young researchers

ERC Starting Independent Researcher Grant: attract and retain the next generation of independent research leaders

- support of “Individual teams” (Principal Investigator and her/his research team)
- all fields of research are eligible
- scientific excellence as the sole criterion for selection
- PI applies together with host institution
- host institution commits to conditions of independence for PI
- research project must be carried out in EU member state or Associated country
- “portability” of grants
- Grant covers 100% of total eligible costs + <20% for indirect costs

- Objective: improve career opportunities and help to gain independence
- **funding** of up to 1.5 Mio. EUR for a **duration** of up to 5 years, in exceptional cases up to 2 Mio. EUR
- calls are published once a year
- next call expected to be published in **summer 2010** with deadlines in **autumn 2010**

- researchers of **any age, any nationality**, residing in any country of the world at the time of application
- researcher must be at the stage at which s/he is **starting or consolidating** her/his own **independent research team/programme**
- PI must have been awarded his/her first PhD (or equivalent doctoral degree) **at least 2 and less than 12*** years prior to the **publication date of the call for proposals** (extensions possible for eligible career breaks) > distinction into **starters** (over 2 and up to **7*** years) and **consolidators** (over **7** and up to **12*** years)

*to be confirmed

- you must have already shown the **potential for research independence** and **evidence of scientific maturity**: at least one important publication without the participation of your PhD supervisor
- you must be able to demonstrate a **promising track-record of early achievements** (appropriate to your research field and career stage): **significant publications (as main author)** in major international peer-reviewed multidisciplinary scientific journals, or in the leading international peer-reviewed journals in your respective field, **invited presentations** in well-established international conferences, **granted patents, awards, prizes** etc.
